

AVE-100 PC Software Official Version Upgrade Notes

Windows Software Release Version:

Version Info	Change / Modification Notes	Release Date
V1.2.0	Firmware upgrade only. Changes are as follows: 1. Optimized Mic compression parameters to address issues with instantaneous volume reduction and abnormal gain during high-dynamic singing; overall dynamic performance is now more natural and stable. 2. Increased the maximum reverb effect volume and Decay by approximately 20%, enhancing spatial ambience to meet larger reverb requirements. 3. Optimized AutoTune latency and signal-chain logic to improve real-time pitch correction responsiveness and stability. 4. AutoTune upgraded to Electric mode, enhancing electric vocal style expression and pitch correction speed. 5. Fixed the issue where semitone/natural scale settings had no effect on AutoTune, and improved the accuracy of Key Learning and the performance of the three-tier harmony effect.	2026-05-19
